EDUCATION

The University of North Carolina at Chapel Hill | Chapel Hill, NC

Bachelor of Science in Data Science, Bachelor of Arts in Peace, War, and Defense | GPA: 3.8/4.0 December 2026

Relevant Coursework: Methods of Data Analysis, ML, Optimization, Probability, AI Ethics, Data Risk/AI, Comm. for DS

Awards & Honors: Dean's List (Fall 2023 - Present) | UNC Global Affairs Policy Brief Competition "Semi-Finalist" Award (2025), Awarded In-State Tuition based on merit

RELEVANT EXPERIENCE

Trellix | *Technical Intern*

Summer 2026

- Developed PreCog V2, a predictive analytics framework leveraging SQL and BigQuery (GCP) to analyze customer telemetry, identify high-risk accounts, and forecast customer churn. Displayed through an interactive cross-functional dashboard.
- Engineered an AI-driven KB Recommender using LLMs to parse queries and surface highly relevant documentation, improving internal information retrieval and decreasing response time to open support cases.

GirlsWhoCode | Chapel Hill, NC | *Teaching Assistant*

Spring 2025 - Present

- Support Python instruction for students in grades 6–12, teaching core programming and computational thinking concepts.
- Translate technical programming concepts into accessible lessons, guiding students through problem-solving and debugging.

SZA&CO Accounting | Long Island, NY | *Summer Intern*

Summer 2025

- Developed an Excel-based system to organize and track documentation across 300+ client files, using formulas and structured data organization to automate manual processes and improve information retrieval.
- Streamlined internal data management workflows, improving efficiency in document tracking and retrieval.

Yallagan | Tel Aviv, Israel | *Data Science Intern*

Summer 2024

- Conducted data analysis to support operational decision-making and enhanced internal control of the company website by restructuring backend data organization, improving how information is stored, managed, and accessed.
- Researched cybersecurity vulnerabilities affecting company systems and contributed analytical insights to internal financial planning. Collaborated with technical and non-technical teams to translate analytical findings into actionable improvements.

PROJECTS

Securing the AI Frontier: Advancing U.S.-New Zealand Alignment in AI Governance, Investment, and Technology

Diplomacy Lab Project, UNC-CH, Chapel Hill, NC

08/26 – Present

- Researching AI governance, investment, and technology security frameworks to develop policy recommendations to strengthen U.S. – New Zealand alignment, in partnership with the U.S. Department of State's Diplomacy Lab.

Cybersecurity Risks Faced by Infrastructure Systems | Partnered Project

Spring 2026

- Model the financial impact of cybersecurity vulnerabilities affecting critical infrastructure systems using ML techniques. Analyze open-source and technical data sources to identify emerging threat patterns and produce analytical insights supported by data visualizations.

Mitigating Russian Cyberattacks on the Internet of Things | Personal Project

Fall 2025

- Analyzed open-source reporting and technical indicators related to Russian cyberattacks targeting Internet of Things infrastructure, identifying emerging threat patterns and developing risk mitigation recommendations.

ADDITIONAL EXPERIENCE

Edge Carolina | UNC-CH

Spring 2026 - Present

- Performed EDA and feature engineering on transaction datasets, analyzing spending behavior by hour, weekday, and channel.
- Developed a Streamlit dashboard with Plotly visualizations and KPI metrics to deliver automated marketing strategy insights.

Deloitte Consulting Workshop | UNC-CH School of Data Science & Society

Fall 2025

- Selected as one of 15 students for a data science consulting workshop: Applied project management, product design, and cloud tools to develop and present a client-ready analytical solution.

Women in National Security | UNC-CH

Fall 2024 - Present

SKILLS

- **Programming Languages:** Python, R, SQL

- **Tools and Technologies:** Tableau, Git, JupyterHub, Google Colab, Docker, Excel, Adobe, VSCode, GCP, BigQuery

- **Machine Learning:** Regression, Clustering, PCA, Supervised & Unsupervised Learning

- **Advanced Spanish and fluent Hebrew**
