EDUCATION

The University of North Carolina at Chapel Hill | Chapel Hill, NC

Bachelor of Science in Data Science, Bachelor of Arts in Peace, War, and Defense | GPA: 3.8/4.0 December 2026

Relevant Coursework: Methods of Data Analysis, ML, Optimization, Probability, AI Ethics, Data Risk/AI, Comm. for DS

Awards & Honors: Dean's List (Fall 2023 – Present) | UNC Global Affairs Policy Brief Competition "Semi-Finalist" Award

RELEVANT EXPERIENCE

Trellix | *Technical Intern*

May 2026 – Present

- Developed PreCog V2, a predictive analytics framework leveraging SQL & BigQuery (GCP) to analyze customer telemetry, identify high-risk accounts, & forecast customer churn; deployed across 43 use cases with additional applications in development & results displayed through an interactive cross-functional dashboard.
- Engineering an AI-driven KB Recommender using LLMs to parse queries & surface highly relevant documentation for open support cases, improving information retrieval & supporting faster case resolution.

GirlsWhoCode | Chapel Hill, NC | *Teaching Assistant*

Spring 2025 – Present

- Support Python instruction for ~20 students in grades 6–12, teaching core programming & computational thinking concepts.
- Translate technical programming concepts into accessible lessons, guiding students through problem-solving & debugging.

SZA&CO Accounting | Long Island, NY | *Summer Intern*

Summer 2025

- Developed an Excel-based system to organize & track documentation across 300+ client files, using formulas & structured data organization to automate manual processes & improve information retrieval.
- Streamlined internal data management workflows, improving efficiency in document tracking & retrieval.

Yallagan | Tel Aviv, Israel | *Data Science Intern*

Summer 2024

- Conducted data analysis to support operational decision-making & enhanced internal control of the company website by restructuring backend data organization, improving how information is stored, managed, & accessed.
- Researched cybersecurity vulnerabilities affecting company systems & contributed analytical insights to internal financial planning. Collaborated with technical & non-technical teams to translate analytical findings into actionable improvements.

PROJECTS

Securing the AI Frontier: Advancing U.S.-New Zealand Alignment in AI Governance, Investment, and Technology

Diplomacy Lab Project, UNC-CH, Chapel Hill, NC

08/26 – Present

- Researching AI governance, investment, & technology security frameworks to develop policy recommendations to strengthen U.S. – New Zealand alignment, in partnership with the U.S. Department of State's Diplomacy Lab.

Cybersecurity Risks Faced by Infrastructure Systems

Spring 2026

Partnered Project, UNC-CH, Chapel Hill, NC

- Model the financial impact of cybersecurity vulnerabilities affecting critical infrastructure systems using ML. Analyze open source & technical data sources to identify emerging threat patterns & produce analytical insights with data visualizations.

Mitigating Russian Cyberattacks on the Internet of Things

Fall 2025

- Analyzed open-source reporting & technical indicators related to Russian cyberattacks targeting Internet of Things infrastructure, identifying emerging threat patterns & developing risk mitigation recommendations.

ADDITIONAL EXPERIENCE

Chabad at UNC | UNC-CH | *President*

Fall 2023 – Present

- Promoted to President after 3 years of involvement, overseeing programming, community outreach, & engagement initiatives serving a UNC Jewish community of 1,000+ students; led multiple community & outreach events since Fall '23.

Edge Carolina | UNC-CH

Spring 2026 – Present

- Performed EDA & feature engineering on transaction datasets, analyzing spending behavior by hour, weekday, & channel.
- Developed a Streamlit dashboard with Plotly visualizations & KPI metrics to deliver automated marketing strategy insights.

Deloitte Consulting Workshop | UNC-CH School of Data Science & Society

Fall 2025

- Selected as one of 15 students for a data science consulting workshop: Applied project management, product design, & cloud tools to develop & present a client-ready analytical solution.

SKILLS

- **Programming Languages:** Python, R, SQL
- **Tools and Technologies:** Tableau, Git, JupyterHub, GoogleColab, Docker, Excel, VSCode, GCP, BigQuery, Salesforce
- **Machine Learning:** Regression, Clustering, PCA, Supervised & Unsupervised Learning
- **Advanced Spanish and fluent Hebrew**
